PERFORMANCE GUARANTEE

At EnergyLink International we proudly stand behind everything we do. Period. That is why we offer an unparalleled guarantee on air emissions control solutions. Through our proven designs, extensive experience and advanced analysis, our team of leading experts will not only meet, but exceed, the most stringent air emission standards throughout the world.

CONTROL SYSTEMS

All of EnergyLink International's simple cycle catalyst systems include a PLC-based control system. Most are configured to communicate with the gas turbine controls and the plant's continuous emission monitoring system. These control systems are completely wired, assembled and shop tested to assure easy installation and trouble-free startup. Our control engineers can configure a control system to meet any specific project requirements.

ENERGYLINK ADVANTAGE

- Control systems provide reliable data immediately to ensure better control of operations
- More control over operations drive greater efficiencies for companies
- Rigorous testing ensures control systems have been built for longevity – performance guarantee
- Ease of troubleshooting – technicians can easily read through programming and determine any areas of issues
- Have been specifically designed to withstand harsh environments and extreme temperatures
