BLOWDOWN AND VENT SILENCERS

Noise is one of the most common occupational health hazards and causes of community complaints. Excessive noise levels can affect your workers, your neighbors and leave your operation vulnerable. At EnergyLink International our technical advancements and noise management solutions ensure you not only meet but exceed the most stringent international regulatory and performance standards.

EnergyLink International is a world leader in the design and manufacturing of blowdown and vent silencers. With precision engineering our advanced product line is designed to effectively suppress excessive noise associated with venting high-pressure steam or gas to atmosphere. Our customized solutions deliver above and beyond with minimum maintenance and maximum lifespan.

ENERGYLINK ADVANTAGE

All our silencers are custom designed to meet your specific noise reduction and back pressure requirements.

- Compressor / gas transmission line blowdown
- Process vents
- Steam discharge at power plants
- Boiler blowdown
- Safety and relief valve discharge
