RON BROWN**Manager, Procurement and Logistics**

Responsible for overseeing all business intelligence in supply chain management, Ron has 30 plus years of experience in production planning for projects in the power generation sector. As the Manger, Procurement and Logistics, Ron has developed a vast network that ensures maximum procurement efficiency and timely execution of all key deliverables involved in EnergyLink International projects. Ron's skilled business acumen has streamlined logistical operations, leading to improved productivity at EnergyLink International worksites.

Ron began his career in 1985 with TME industries. In 1988 he joined Pneuveyor Systems, where he entered the world of purchasing. By 2002, Ron had built a strong reputation in the supply-chain industry and joined Kenrod Steel, a custom steel fabricator for the power industry whose clients included Rolls-Royce, GE and Babcock & Wilcox. He was responsible for reconciling purchase orders and negotiated contracts for all project deliveries. Ron then joined INNOVA Global, formerly ATCO Emissions Management in 2011 as a Senior Buyer. Recognized for his expertise and knowledge in optimizing work-flows, Ron was recruited by EnergyLink International in 2020. Using LEAN manufacturing processes and JIT (Just-In-Time) delivery methods when needed, Ron's synergy with Project Managers has ensured reliable delivery of EnergyLink International project goods in accordance to specified contract deadlines.

Ron received his General Business Diploma in Accounting from Georgian College and is a recognized Supply Chain Management Professional from the Supply Chain Management Association of Ontario.
