

JUST IMAGINE...

The most reliable **Acoustic Barriers** that continue to deliver more...

Guaranteed Performance

Precise sound transmission and absorption performance.

Superior Design

Innovative design composed of sound absorbing /blocking materials, durable surface options and effective designs to limit sound transmission refraction and deflection.

Barrier Panels

Acoustic barrier panels ranging from 5' to 24' long and 3' to 4' wide. Have designed for 100' high.

Seamless Installation

Panel cassettes ensure quick and efficient installation.

Greater Efficiencies

Greater value for customers due to in-depth experience, innovative and proprietary design and low fabrication cost.

In-Depth Testing

Laboratory and field tested with precise Noise Reduction Coefficient (NRC) and Sound Transmission Class (STC) ratings.

It's not only possible,
we're doing it.

A RESPECTED LEADER

EnergyLink International provides sound protection with high-performing barrier walls that are specifically designed for maximum noise mitigation as well as laboratory and field tested with some of the best Noise Reduction Coefficient (NRC) and Sound Transmission Class (STC) ratings. With leading edge technology that includes sound-absorbing and sound-blocking materials in a variety of options, we offer design support, manufacturing and installation of customized industrial-grade metal sound barriers to meet your specific needs.

PERFORMANCE GUARANTEE

At EnergyLink International we proudly stand behind everything we do. Period. That is why we offer an unparalleled performance guarantee on all our barriers. Through our proven designs, extensive experience and advanced analysis, our team of leading experts will not only meet, but exceed, the most stringent noise mitigation standards throughout the world.

DESIGN EXPERTISE

As respected leaders in barriers, our team averages more than 100 years of direct design experience working with one of the largest and most diverse portfolio of barrier applications. Through our investment in time and resources we are further

able to engage in leading-edge design development activities that put us at the forefront. At EnergyLink International it's never just about maintaining the status quo; it's about driving innovation and setting a higher standard for others to follow.

GREATER VALUE

At EnergyLink International, not only are we committed to delivering the best solutions possible, we look at every aspect of the project to provide optimum value for our customers. Whether it is with greater efficiencies, uncompromised expertise, dependable hands-on experience or through strategic and insightful negotiations so we can pass on much lower costs, the value we deliver is broad and far reaching and will continue to push us to deliver even more. By incorporating these important steps into our everyday practices, we can provide low-cost barriers with high quality manufacturing, resulting in the most effective noise control solutions.

QUALITY FIRST

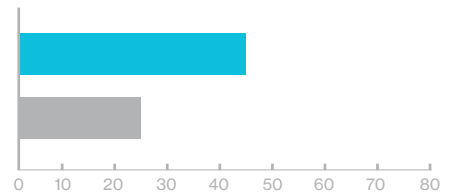

We know our reputation is based on the quality products we produce. Through advanced technology, rigorous testing and surpassing the highest quality standards, we continue to be at the forefront in creating efficient products that are specifically designed to outperform and outlast.

ENVIRONMENTAL STEWARDSHIP

EnergyLink International is committed to creating a cleaner and quieter world around us. That is why we are a leader in delivering products and services that are specifically designed to mitigate noise and air emissions — significantly reducing your environmental footprint.

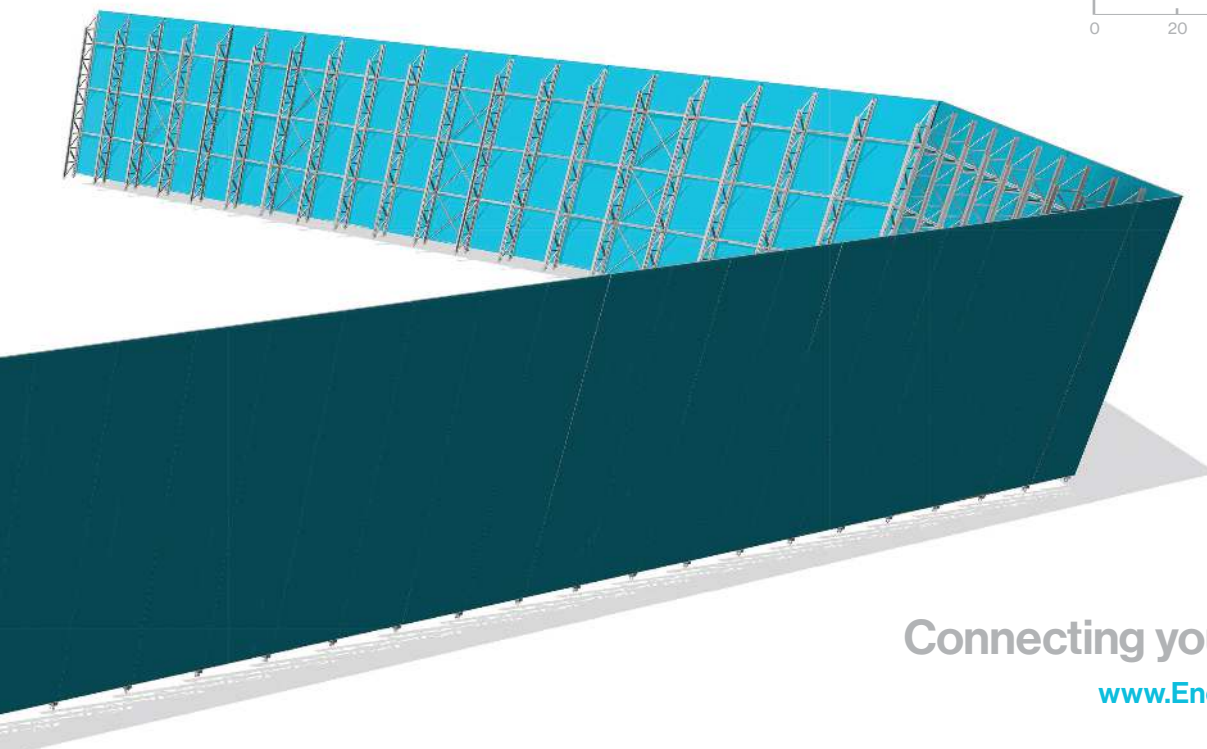

OUTPERFORM (Sound Transmission Class)

- EnergyLink Has Achieved 45 STC
- Industry Average 25 STC

OUTPRODUCE (Advanced Solutions)

- EnergyLink Has Designed For +100' High Barrier Walls
- Industry Average 25' High

Connecting you to a better way.
